➡ **Virtual Reality Language Exchange: Practice language skills in a virtual environment with native speakers.**

Step: The following step to upload a Repository to GitHub via GitBash.

Step1: Install Git:

Step2: Configure Git (only needed once)
   Bash code or Git terminal: we can follow any one
    I create the repository by git bash:
   Git config –global user .name "Riyatrivedi0104"
   git config –global user.email "2301031000095@silveroakuni.ac.in"

Step3: Create a repository on GitHub:

   First i log in to GitHub.
   Click on "New Repository" and give it a name.
   Keep it public or private ,here I keep public.

Step4: Go to project folder:
   Open the terminal and navigate to the folder containing your files:
   Bash code = cd ..
          Cd 2301031000095

Step5: Initialize Git:(create a new local repository)
   Bash code = git init 2301031000095

Step6: Create the assignment folders:
Bash code = mkdir Assignment_1
         mkdir Assignment_2

Step7: Add the folder to Git:
   Bash code = git add Assignment_1 Assignment_2

Step8: commit the changes:
 Bash code = git commit -m "Added Assignment_1 and Assignment_2 folders"

Step9: Push the Changes to GitHub:
 Bash code = git push -u origin master
